

SCOTTSDALE - On Saturday, September 19th, U.S. Rep. Harry Mitchell will be joined by his son, Tempe Councilmember Mark Mitchell and hundreds of other Arizonans in the first annual Walk for POP (Prostate On-Site Project) to showcase the importance of early detection of prostate cancer, the second-most diagnosed form of cancer in men. The event will include a festive, educational walk to highlight National Prostate Cancer Month. Mitchell serves as Honorary Chairman of the event.

"As a survivor of prostate cancer, I know from firsthand experience that early detection is important," Mitchell said. "The Prostate On-site Project is doing excellent work providing free prostate screenings for anyone who registers, and I'm proud to support this excellent organization that's saving lives here in our community."

POP is a non-profit organization founded in 1998 to raise the awareness of prostate cancer and the importance of screening. For more information, visit www.prostatecheckup.com.
